Detailed Action

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 50-68 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It is unclear how the connection system secures the reticle to the mounting plate in the first through third degrees of freedom and compliantly in the fourth through sixth degrees of freedom. It appears the reticle plate is restrained except for motion to and from the mounting plate. Clarification is required.

It is also unclear how out of plane movement of the reticle plate with respect to the mounting plate is prevented since the reticle plate moves toward and away from the mounting plate, i.e., out of plane movement. Clarification is required.

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 50-59 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3652

Regarding claim 50, the phrase "allows the reticle plate to be rigidly secured" renders the claim indefinite since the word allows is not a positive connection. A more clear phrase would be --rigidly secures the reticle plate--. Also "secured" in the last line should be --secures it--. Further the phrase "is used" is indefinite since it is unclear whether or not the robot is being claimed. Clarification is required.

5. Claims 60-68 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear whether the reticle plate and mounting plate are claimed. In claim 60 it appears the reticle plate and mounting plate are not positively claimed but yet the means for connecting is define regarding the relationship the means permits between the plates. Either the means should be defined based on its own structure or the plates should be positively claimed. In claims 61, 62 and 63, the means are positively related to the plates but as noted above the plates are not positively claimed. Clarification is required. In claims 64, 65 and 66, these claims further define the reticle plate which is not positively claimed in claim 60 rendering them indefinite. In claim 67, an intended use of a robot is set forth but no robot is positively claimed in claim 60. Clarification is required. Further regarding claim 60 and regarding claim 68, the "is used" is indefinite since it is unclear whether or not the robot is being claimed. Clarification is required. Finally, further regarding claim 66, the phrase "lands a seals" is unclear. Clarification is required.
